GENERAL INFORMATION:
APPLICANT: Ingram, Vernon M.
APPLICANT: Blanchard, Barbara J.
APPLICANT: Blanchard, Barbara J.
TITLE OF INVENTION: TREATMENTS FOR NEUROTOXICITY IN ALZHEIMER'S
TITLE OF INVENTION: DISEASE CAUSED BY -AMYLOID PEPTIDES
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  COMPUTER READABLE FORM:

RESULT 94 US-09-724-551-42

Sequence 42, Application US/09724551
Patent No. 6787637
GENERAL INFORMATION:
APPLICANT: Schenk, Dale B.
APPLICANT: Bard, Frederique
APPLICANT: Yednock, Ted
APPLICANT: Yednock, Ted
APPLICANT: Yednock, Ted
APPLICANT: Yednock, Ted
CITTLE OF INVENTION: Prevention and Treatment of Amyloidogenic Disease
FILE REFERENCE: 15270J-004760US
CURRENT APPLICATION NUMBER: US/09/724,551
CURRENT FILING DATE: 2000-11-28
PRIOR APPLICATION NUMBER: US/09/580,018
PRIOR FILING DATE: 2000-05-26

      Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Score
